Nisha Ramdas Jaunjal

Qualifications: B.Tech. in Engineering (Vishwakarma Institute of Information Technology, Pune)
Total IT Experience: 2 years
Specialization: Angular, HTML, CSS, JavaScript, TypeScript, PrimeNG, and Bootstrap

Experience Summary:

With 2 years of experience as a Frontend Developer, I have a strong background in the design, development, and implementation of dynamic web applications. I specialize in utilizing Angular, HTML, CSS, JavaScript, TypeScript, PrimeNG, and Bootstrap to create responsive and user-friendly interfaces. My expertise extends to crafting seamless, high-performance solutions by integrating modern frontend frameworks with backend APIs and ensuring optimal functionality across diverse platforms.

Throughout my career, I have focused on optimizing user experience by translating business requirements into clean, efficient, and maintainable code. I consistently collaborate with cross-functional teams, including designers, backend developers, and product managers, to ensure that projects meet both technical and business objectives. My hands-on experience with debugging and testing has equipped me with the skills to deliver secure, scalable, and error-free web applications.

Domain Knowledge:

Possess in-depth domain knowledge of the healthcare industry, with a strong focus on Hospital Management Information Systems (HMIS). Experienced in working with key modules, including RIS (Radiology Information System), CSSD (Central Sterile Services Department), Biomedical Waste, and Inventory, OPD. Proficient in understanding the intricacies of healthcare workflows and leveraging technical expertise to optimize these modules for improved operational efficiency, enhanced user experience, and seamless integration across system components.

Skills:

Programming	Angular JavaScript, Typescript, HTML,CSS
Tools	Intellij, Webstrom, Vs code, Postman, Jira, Gitlab, Source Tree
Database	Mysql, MongoDb
Operating Systems	Windows
Competencies	Team Collaboration, Strategic Decision Making, Communication, Project Management, Continuous Learning

Project Experience

Project 1:

Organisation	Medimaze Solutions Pvt. Ltd.
Project Name	HMIS
Client Name	Satara, Apulki , Manuguru
Duration (From – To)	April 2023 to Present
Description	HMIS is a comprehensive, integrated software solution designed to manage and streamline the operations of a hospital or healthcare facility. It automates various administrative, financial, and clinical processes to improve efficiency, accuracy, and patient care.
Business Domain	Healthcare
Project Type	Software Development/Analysis/Design
Technologies	Angular, SpringBoot, Mysql, JAVA, HTML ,CSS.
Role	Contributed to the development and optimization of HMIS, focusing on key modules like RIS, CSSD, Biomedical Waste, and Inventory. As a Frontend Developer, I specialize in building and enhancing user interfaces using Angular to improve workflow efficiency and user experience.
Team Size	4

Certifications:

Udemy	The Complete Guide to HTML
Udemy	SQL for Beginners: Learn SQL using MySQL and Database Design
Udemy	JavaScript Basics for Beginners
Udemy	Java Programming for Beginners
Udemy	Angular Step by Step for beginners
